PROFESSIONAL SUMMARY

Senior Solutions Architect and Java backend engineer with 6+ years of experience delivering enterprise systems across telecommunications, insurance, banking, fintech, government, and logistics. Specialized in Java, Spring Boot, microservices, REST APIs, enterprise integration, and Guidewire PolicyCenter/Gosu. Current work supports Globe Telecom's Case Management and Trouble Ticket Management platform; prior engagements include PwC, Singapore Government systems, GCash, Metrobank, and Manulife.

CORE TECHNICAL SKILLS

Languages: Java, Gosu, JavaScript/TypeScript, SQL, XML | Backend: Spring Boot, Spring MVC, Node.js, Microservices, REST APIs, OAuth2
Guidewire: PolicyCenter, BillingCenter, ClaimCenter, ContactManager, Product Model, Configuration & Integration | Integration: MuleSoft, API & System Integration

Cloud/DevOps: AWS, Jenkins, CI/CD, Monitoring | Frontend: React, Angular | Engineering: Agile, Code Review, Unit Testing, Troubleshooting, Security

PROFESSIONAL EXPERIENCE

NCS Group (National Computer Systems) | Senior Solutions Architect Oct 2025 - Present

Client: Globe Telecom | BGC, Taguig | Case Management System - Trouble Ticket Management

- Design and develop backend services and enterprise integrations for Globe Telecom's Case Management System supporting end-to-end Trouble Ticket Management.
- Implement REST API integrations covering Create, Update, Retrieve, List, and Close trouble-ticket lifecycle workflows across customer experience and case-management platforms.
- Develop Java/Spring Boot integration components, request/response mappings, validation rules, ticket characteristics, resolution workflows, and downstream service integrations.
- Troubleshoot API failures, SSL connectivity issues, payload-mapping defects, and environment-specific issues during SIT and staging.
- Collaborate with QA, developers, architects, and business stakeholders on requirements, integration design, defect resolution, and production-ready delivery across CRM, customer, resource, work, and appointment-management services.

Technologies: Java, Spring Boot, Microservices, REST APIs, JSON, API Integration, System Integration, CRM, Case Management, Agile

PricewaterhouseCoopers (PwC) Acceleration Center Manila | Senior Software Engineer Dec 2024 - Sep 2025

BGC, Taguig | Encova - Guidewire PolicyCenter | Insurance

- Developed and configured Guidewire applications, with emphasis on PolicyCenter, to support insurance business requirements.
- Built and customized Guidewire product models and application functionality using Gosu, Guidewire configuration, APIs, XML, and Java.
- Collaborated with PwC Shanghai counterpart developers on analysis, design, and implementation of PolicyCenter configurations.
- Performed unit testing, troubleshooting, bug fixing, code review, and feature development; provided technical guidance and mentoring to junior developers.

Technologies: Guidewire PolicyCenter, BillingCenter, ClaimCenter, ContactManager, Gosu, Java, XML, Agile

Pan Asia Resources | Senior Software Engineer Jan 2024 - Dec 2024

BGC, Taguig | Singapore Government - ACRA System Development

- Developed and maintained enterprise application functionality for Singapore's ACRA system using Java, Spring Boot MVC, React, and TypeScript.
- Implemented new features, resolved application defects, optimized code, and translated client requirements into technical solutions.
- Conducted code reviews, supported junior developers, and participated in Agile delivery cycles.

Technologies: Java, Spring Boot, Spring MVC, React, TypeScript, REST APIs, Agile

Yondu | Senior Software Engineer May 2023 - Dec 2023

Makati | Entrego - Rider Tracking

- Developed real-time rider-tracking backend functionality using Java, Spring Boot, microservices, and REST APIs.
- Optimized backend processes for reliable data flow and coordinated implementation, testing, deployment, and post-deployment support.

Technologies: Java, Spring Boot, Microservices, REST APIs

Collabera Tech Inc. | Senior Software Engineer Jan 2022 - May 2023

Makati | GCash - GCrypto | Fintech

- Developed backend services and APIs supporting cryptocurrency transactions and account-management capabilities.
- Used MuleSoft and Java to integrate backend services with GCash systems and supported security, monitoring, troubleshooting, and testing.

Technologies: MuleSoft, Java, APIs, System Integration, Security

Novare Tech Inc. | Senior Software Engineer Jan 2021 - Jan 2022

Taguig | Metrobank Mobile Banking Application

- Developed and maintained Java/Spring Boot backend functionality, including easy-loan application features and production defect resolution.
- Performed root-cause analysis, backend performance optimization, security collaboration, and critical production support.

Technologies: Java, Spring Boot, Node.js, Backend Development, Security

Manulife Philippines | Backend Java Software Engineer / DevOps Support **May 2020 - Jan 2021**

Makati | EPOS E-Insurance Application

- Supported EPOS through Java backend bug fixes, stability improvements, production troubleshooting, Jenkins deployments, AWS DevOps support, and automated health monitoring.

Technologies: Java, Jenkins, AWS, DevOps, Monitoring

NovaSolutions Technology | Junior Java Developer **Jan 2019 - May 2020**

Ortigas | Singapore Government - Corenet Website Migration

- Developed Java backend components supporting the Corenet1-to-Corenet2 migration and performed system testing, validation, documentation, deployment support, and integration activities.

Technologies: Java, Web Development, System Integration

EDUCATION

Far Eastern University Institute of Technology | Bachelor of Science in Computer Science, Specialization in Software Engineering

May 2014 - Aug 2019 | Manila
